

Black Square Problem: In this challenge, you will create a series of small compositions. Each composition will consist of only 4 black squares. That's it. No more, no less, no color. Each of the graphic images you create will express the word below the box.

Process: A critical part of this process is the exploration of possibilities using a limited vocabulary (4 squares) to create a variety of meanings. This will expand your personal expression, graphically speaking. It is important that you create several solutions to each problem and then select the most effective one.

Using the file provided for you, create 2 possibilities for each word. Copy and enlarge the best solution into the large design space. Save the completed file as class_lastname_square.pdf
